

ECO V[®]

ECO V[®] & ECO VP

An innovative and user-friendly trellising system for pipfruit and cherry growers.

ABOUT ECO VP

ECO VP (Vertical Post) has been developed for apple and cherry trellising. It has been designed to support 2D growth. Hawke's Bay orchardists have led the way on using our steel posts in their apple orchards. Our ECO VP is a perfect system for both new orchard developments and the replacement of damaged wooden posts.

ABOUT ECO V[®]

ECO TRELLIS[®] Horticulture Solutions has developed an innovative and sustainable trellising system called ECO V[®]. The new system is very easy to install and has been designed specifically for pipfruit growers, especially apple orchardists. The new system may also be used for growing cherries.

ECO V[®] offers better growing opportunities and has the potential to increase fruit yields. Nelson and Hawke's Bay orchardists have led the way, installing the new system in their apple orchards. Central Otago is trialling the new system for cherries.

ECO TRELLIS[®] Horticulture Solutions is owned and manufactured by NZ Tube Mills, a privately owned company with a large manufacturing plant based in Wellington. NZ Tube Mills produce an extensive range of products for the horticulture industry along with stainless steel and carbon steel tube products.

THE ECO V[®] & VP ADVANTAGE

- ▶ Research and testing, followed by a comprehensive product development process
- ▶ Environmentally friendly
- ▶ Sustainable and fully recyclable
- ▶ Made from high-strength galvanised carbon steel which is coated with a thick layer of zinc, ensuring high durability against corrosion
- ▶ Able to be retrofitted to existing orchards
- ▶ Cost-competitive – attachments can be applied for crop protection
- ▶ Simple installation with easy to attach wire positions
- ▶ Lightweight and safe
- ▶ Guarantee against any material or manufacturing fault
- ▶ After sales support from your local ECO V[®] team
